DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Roller (U.S. Patent No. 6,366,747).

Regarding claim 1, Roller discloses a system for permitting insertion or replacement of electronic cards, the system comprising: (a) a scanner for scanning hardcopy elements, the scanner comprising: (a1) an electronic component for performing at least one processing function on an electronic representation of the hardcopy element; (a2) a first processor for directing operations of the scanner and for receiving directions that are passed to other components; (a3) a field-installed electronic card that performs additional processing on the electronic representation of the hardcopy element (fig. 1, col. 3, line 62 through col. 4, line 41);

Art Unit: 2622

and (b) a second processor electrically connected to the scanner for sending directions to the scanner processor which processor includes field-installed control code for directing the field-installed electronic card (col. 5, line 39-54).

Regarding claim 2, Roller discloses the system as in claim 1, wherein the scanner includes an electronic board into which the field-installed electronic card is inserted (col. 5, line 39-54) .

Regarding claim 3, Roller discloses the system as in claim 1 further comprising a computer into which the second processor resides (col. 5, line 39-54).

Regarding claim 4, Roller discloses the system as in claim 1, wherein the field-installed electronic card includes a third processor (col. 5, line 39-54).

Regarding claim 5-8, argument analogous to those presented for claims 1-4 are applicable to claims 5-8 respectively.
